Boardmaker™ for Windows UK Version Notes

The Boardmaker for Windows includes:

- a user's guide and picture index
- 5 diskettes (labeled 1 - 5)
- a training video

Boardmaker for Windows requires you use Windows 3.1 or better.

Please be sure and return your gray registration card to our office. It is the only way we can keep track of Boardmaker users so that we may notify you when upgrades are available.

You may not sell or give away copies of this software.

The Picture Communication Symbols are copyrighted materials. You may not sell or give them away without the written permission of the Mayer-Johnson Co. Their use is allowed in limited form only. The reproduction of any part for commercial use, or for entire school system, hospital system, or institutional system is strictly prohibited.

In order for us to continue making good augmentative communication materials, we need your support.

Thank you.

This sheet was made for VHS Videos.
The numbering will be different for your PALS system.
This sheet is intended to be used for a general topic index.
(We didn't have a PALS machine available to reset the numbering)

This is a general index for this video. The numbers after each section show the counter number at that point. Counters on VCR's vary from machine to machine, so you may have to hunt a little, but it should put you in the general area.

To use this index, **set the counter on your VCR at 0 (zero) when the music starts at the beginning of the video**. Then fast forward to the counter number of the demonstration you would like to see.

VCR Counter Index
